**WHICH MOUNT
TO USE FOR
YOUR DOG?**

WHICH MOUNT TO USE FOR SMALL DOGS?

SMALL DOGS

When you use a safety light on a small dog, you must be aware that the dog is naturally much closer to the ground than larger dogs. This means that road users can have difficulties noticing the dog, as it is not at eye level. So always think about whether your safety light can be placed above the dog - best on your dog's leash.

If your dog runs freely in the dark, it's good to use a safety light. That way, you're sure your dog is visible to others, and it's also quite fun to play with your dog in the dark.

WEARING COLLAR

Small dog - long fur and short fur

WE RECOMMEND

We do not recommend placing the light directly on the collar of a small dog, as the light will be too close to the ground.

A small dog moves just 10-15 cm above the ground, and is therefore far below the eye level of road users. As most road users look ahead and not down below their natural eye level, there is a great risk of them not noticing the light or dog.

Instead, attach your Orbiloc Safety Light to the harness, leash or dog coat.

See recommendations for small dogs on the following pages.

WEARING HARNESS

Small dog - long fur and short fur

WE RECOMMEND

Use the Quick Mount Adjustable or Clip on a harness. Attach the light on the back of the dog, in order to spread the light in as many directions as possible. If you choose to attach the light on one of the sides, do so on the side facing oncoming traffic.

Quick Mount
Adjustable

Clip

Notice: Don't use the Clip on dogs that run freely.

SMALL DOGS - WEARING HARNESS

WEARING LEASH

Small dog - long fur and short fur

WE RECOMMEND

Use the Quick Mount Adjustable, Clip or Carabiner on the leash. When the light is attached on the leash, other road users are made aware of both you and your dog, as the light is distributed at eye level. Keep the dog in a short lead, in order for the dog not to move too far away from the light.

Quick Mount
Adjustable

Clip

Carabiner

Notice: Don't use the Clip on dogs that run freely.

SMALL DOGS - WEARING LEASH

WEARING DOG COAT

Small dog - long fur and short fur

WE RECOMMEND

Use the Quick Mount Adjustable if the dog coat has a strap, and the Clip when the dog coat has no strap. Attach the light on the back of the dog, in order to spread the light. If you choose to attach the light on one of the sides, do so on the side facing oncoming traffic.

Quick Mount
Adjustable

Clip

Notice: Don't use the Clip on dogs that run freely.

WHICH MOUNT TO USE FOR MEDIUM DOGS?

MEDIUM DOGS

You can use all attachments from Orbiloc for medium-sized dogs. Regardless of whether they have long or short fur.

When you are out with your dog in the dark, you shouldn't only think about safety. Attach the light so that your dog can play despite of the darkness.

While energy levels vary from dog to dog, medium breeds may need more exercise than others. There is no better way for the dog to exercise than to be unleashed and run freely and play. When the light is securely attached you can let it run without any worries.

WEARING COLLAR

Medium dog - long fur and short fur

WE RECOMMEND

Use the Quick Mount Adjustable or Clip. Position your light opposite the D-ring on the collar, when the dog is running freely. When the dog is walking on a leash, attach the light next to the D-ring on the collar.

Quick Mount
Adjustable

Clip

Notice: Don't use the Clip on dogs that run freely.

MEDIUM DOGS - WEARING COLLAR

WEARING HARNESS

Medium dog - long fur and short fur

WE RECOMMEND

Use the Quick Mount Adjustable or Clip on the harness. Attach the light on the back of the dog, in order to spread the light in as many directions as possible. If you choose to attach the light on one of the sides, do so on the side facing oncoming traffic.

Quick Mount
Adjustable

Clip

Notice: Don't use the Clip on dogs that run freely.

MEDIUM DOGS - WEARING HARNESS

WEARING LEASH

Medium dog - long fur and short fur

WE RECOMMEND

Use the Quick Mount Adjustable, Clip or Carabiner on the leash. When the light is attached on the leash, other road users are made aware of both you and your dog, as the light is distributed at eye level. Keep the dog in a short lead, in order for the dog not to move too far away from the light.

Quick Mount
Adjustable

Clip

WHICH MOUNT TO USE FOR LARGE DOGS?

LARGE DOGS

When you go for a walk with your large dog after nightfall, you naturally must make sure it can be seen by others - first and foremost by road users.

There is nothing better than to see your dog play and romp around outside - and if it's wearing the Orbiloc Safety Light, you are never in doubt as to where it is.

No matter where and how you attach the light on your large dog, you can be sure that the light will withstand the weight and pressure your dog exposes it to. The light can withstand up to 100 kg, and you can therefore let your dog run freely and play with the light attached without any worries of breaking or damaging the light.

WEARING COLLAR

Large dog - long fur and short fur

WE RECOMMEND

Use the Quick Mount Adjustable or Clip. Be aware of positioning your light opposite the D-ring on the collar, when the dog is running freely. When the dog is walking on a leash, attach the light next to the D-ring on the collar. To bring out the light from the fur and get the most out of the high visibility, you can advantageously use the Carabiner.

Quick Mount
Adjustable

Clip

Carabiner

Notice: Only use the Carabiner on the collar of large-sized dogs with long fur. Don't use the Clip on dogs that run freely.

LARGE DOGS - WEARING COLLAR

WEARING HARNESS

Large dog - long fur and short fur

WE RECOMMEND

Use the Quick Mount Adjustable or Clip on the harness. Attach the light on the back of the dog, in order to spread the light in as many directions as possible. If you choose to attach the light on one of the sides, do so on the side facing oncoming traffic.

Quick Mount
Adjustable

Clip

Notice: Don't use the Clip on dogs that run freely.

LARGE DOGS - WEARING HARNESS

WEARING LEASH

Large dog - long fur and short fur

WE RECOMMEND

Use the Quick Mount Adjustable, Clip or Carabiner on the leash. When the light is attached on the leash, other road users are made aware of both you and your dog, as the light is distributed at eye level. Keep the dog in a short lead, in order for the dog not to move too far away from the light.

Quick Mount
Adjustable

Clip
