

## About Orbiloc®

Orbiloc® is a Danish producer and seller of high-quality LED safety lights for people and their canine companions. Our safety lights are durable, bright and waterproof. Best of all, they are made exclusively in Denmark.

Everything about the Orbiloc Safety Lights is based on quality, design and workmanship to allow outdoorsy people the freedom to engage in their interest, while being safe. Based on our strong values, we practise sustainable production and we refuse to compromise on quality.

### Orbiloc – The Safety Light

#### Our values:

Everything we do is the result of developing our company – and our products – based on core values. They are embedded in every aspect of our business, and we employ these fundamental beliefs when interacting not only with our customers, but also with all our stakeholders.

- **Safety:** Simply put, we always put safety first. The safety of our customers is first and foremost in everything we do, and we pride ourselves on being at the cutting edge of the safety revolution, continuously researching and updating our designs. It's no accident that safety is perhaps the most important consideration we have when creating our top-of-the range products.
- **Quality:** We believe that safety and quality go hand in hand. Our products are tested to meet the highest standards to ensure your safety. The quality meets our customers' increasing demands for the best safety lights available. And to ensure your complete satisfaction, we provide a three-year warranty on all our products.
- **Responsibility:** To us, responsibility means acknowledging that we are always part of a greater whole. We are firm believers in creating products that are as sustainable as possible, meaning we take responsibility for our surroundings and ourselves. We strive to run our business with as minimal an impact on nature as possible, while being the best in terms of safety. This is also why Orbiloc provides a wide selection of mounts and maintenance equipment, for the user to take care of their light for a lifetime and adapt it to their special needs.
- **Respect:** What does respect mean? When it comes to safety lights, it means acknowledging that we influence others by our choices. That means having respect for the potential dangers of the dark, for others around you, and for the world in general. Being visible in the dark is showing respect for others and taking responsibility for your safety.
- **Honesty:** What you see is what you get – in all aspects. We strive to constantly develop our products and designs, not only when it comes to safety, but also when it comes to how we do business, how we impact the environment, and how we influence the society in which we operate.

### Mission and vision

Our vision is to ensure that all customers - individual people, professional organizations and their canine companions - have the highest possible level of safety when it is dark, in all kinds of weather and in every type of environment.

### Sales and production

Orbiloc Safety Light® is sold in relevant shops worldwide, and via [orbiloc.com](http://orbiloc.com), there are online sales worldwide. (Find information about retailer at our website). Production also takes place in Denmark in a high-tech and advanced set-up, which helps to guarantee quality and design.
