

Fact sheet

Everything you should know about the Orbiloc Safety Light™.

Orbiloc® is a Danish producer and seller of high-quality LED safety lights. Our safety lights are durable, bright and waterproof. Best of all, they are made exclusively in Denmark, which means they meet the highest standards in quality, design and workmanship. And that is why each comes with a three-year warranty. We are passionate about what we do, and we take pride in providing the best products and services for our customers.

We are passionate about safety and take pride in providing the best products and services.

Values

Everything we do is the result of developing our company – and our products – based on core values. They are embedded in every aspect of our business, and we employ these fundamental beliefs when interacting not only with our customers, but with all our stakeholders.

- **Safety:** Simply put, we always put safety first. The safety of our customers is first and foremost in everything we do, and we pride ourselves on being at the cutting edge of the safety revolution, continuously researching and updating our designs. It's no accident that safety is perhaps the most important consideration we have when creating our top-of-the-range products.
- **Quality:** We believe that safety and quality go hand in hand. Our products are tested to meet the highest standards to ensure your safety. The quality meets our customers' increasing demands for the best safety lights available. And to ensure your complete satisfaction, we provide a three-year warranty on all our products.
- **Responsibility:** To us, responsibility means acknowledging that we are always part of a greater whole. We are firm believers in creating products that are as sustainable as possible, meaning we take responsibility for ourselves and our surroundings. We strive to run our business with as minimal an impact on nature as possible, while being the best in terms of safety.
- **Respect:** What does respect mean? When it comes to safety lights, it means acknowledging that we influence others by our choices. That means having respect for the potential dangers of the dark, for others around you, and for the world in general. Being visible in the dark is showing respect for others and taking responsibility for your safety.
- **Honesty:** What you see is what you get – in all aspects. We strive to constantly develop our products and designs, not only when it comes to safety, but also when it comes to how we do business, how we impact the environment, and how we influence the society in which we operate.

Mission and vision

Our vision is to ensure that all customers - individual people, professional organizations and their canine companions - have the highest possible level of safety when it is dark, in all kinds of weather and in every type of environment.
